# The key to wellness

Danfoss wireless CF2 floor heating control system

Wireless wellness by Danfoss

# Where does wellness come from?

For generations Danfoss has provided advanced heating control solutions all over the world, and the Danfoss family of products and solutions offer a world of wellness in heating.

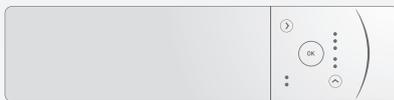

The Danfoss products form the basis for indoor heating in a number of environments, and they play an important part in ensuring the optimum indoor climate and comfort. This has always been part of our heritage, and the new **Danfoss wireless CF2 floor heating control system** expands this tradition even further.

The wireless CF2 system offers an extremely user-friendly approach to controlling hydronic floor heating.

CF2 provides timeless design, easy operation, individual room or floor temperature control, and even the option of a wireless remote control.

The CF2 system is the obvious choice for controlling floor heating in e.g. bathrooms, living rooms, rooms with quarry tile or wooden floors, providing safe, easy-to-use, energy efficient and environment-friendly heating.

***And that is where wellness comes from.***

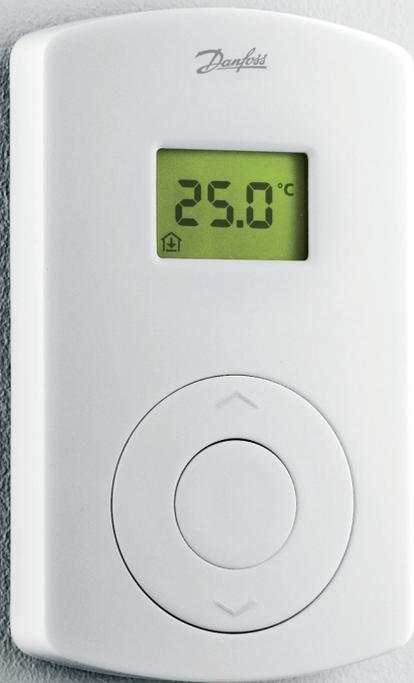

Wireless wellness by Danfoss

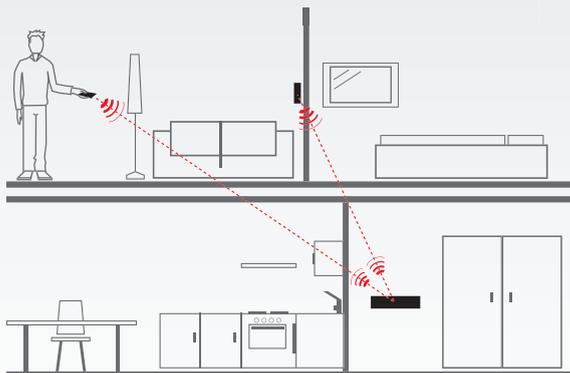

Simply  
designed  
for wellness

Comfort  
begins at  
floor level

# A world of possibilities in the palm of your hand

## All the benefits of CF2!
